

Market Risk Dashboard

- generated_at: `2026-05-24 11:38:57 Asia/Taipei`
- data_date: `20260522`
- market_regime: `strong\_bull`
- risk_level: `elevated\_risk`
- risk_score: `3`
- futures_options_source_status: `ready`

Data Status

This report uses official market index data already stored in the repo plus TAIFEX open data for futures, options, put/call ratio, and Taiwan VIX. It is a market-background dashboard, not a trading instruction.

Market Index Regime

Futures / Options Positioning

Risk Notes

- TWSE strong bull
- TPEx strong bull
- Taiwan VIX elevated
- TXO put/call OI hedge elevated
- Foreign TX futures heavy net short

Usage Boundary

- Use this dashboard as market background for Taiwan index futures and portfolio exposure review.
- Do not treat a single futures/options indicator as a buy or sell signal.
- Keep this report separate from the daily all-market candidate-stock report; that report may cite market regime only as background.
